**DETAILED ACTION**  
**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kyle Reinehart on 4/2/2007. The purpose of the amendment is to clarify claim language to recite statutory subject matter.

The application has been amended as follows:

2. In claim 2, line 1, please insert "having a buffer, memory resources, and flow control logic, said receiver" before "comprising";

In line 10, please insert "said" before "memory resources";

In line 10, please insert "said" before "flow control logic";

In line 13, please replace "a buffer" with "said buffer".

3. In claim 52, line 1, please insert "storage" before "medium".

4. In claim 76, line 1, please insert "storage" before "medium".

***Allowable Subject Matter***

Art Unit: 2182

5. Claims 34, 35, 39, 40, 43-47, 49-57, 59-70, 72-76 allowed.
6. The following is a statement of reasons for the indication of allowable subject matter.

Claims 34, 39, 62 recites, inter alia, a "descriptor including multiple sets of buffer parameters that specify multiple points on a rate-buffer size curve" and "based at least in part upon the level of robustness for the robust channel and effective rate of the data of the selected channel, identifying a buffer size using one or more of the multiple sets of buffers parameters, wherein for different levels of robustness the rate-buffer size curve provides different buffer sizes for the data of the selected channel". Prior art of record do not teach or suggest, either alone or in combination, the aforementioned limitation, nor would it be obvious to modify those references to include such limitation.
